

## Quality Control Laboratory Technician

### Peterborough

Competitive salary and benefits package

ELeather is an environmentally friendly materials technology company that is headquartered in Peterborough and exports to over 40 countries worldwide.

ELeather take unused traditional leather fibre and through a totally unique and patented process, engineer a high-performance, technically advanced leather fibre composite. ELeather products are designed and manufactured to provide exceptional performance characteristics delivering an eco-friendly material that out-performs traditional materials. Our product collections are a true evolution in material technology – maximising performance and enhancing experiences in a more environmentally responsible way.

With an established blue-chip global customer base, the ELeather team are proud to supply over 150 airlines, including the world's four largest, as well as transforming over 12,000 trains and buses, providing a better passenger experience.

ELeather has received multiple technology and sustainability awards, including The Sunday Times 'Tech Track 100' and 'International Track 200', Global Cleantech 100, the ACM Greener Pathways award, and the Financial Times 1000 Companies to Inspire Britain.

The role:

This is a superb opportunity for the right candidate to join our enthusiastic and developing Quality team within a fast-paced, growing organisation.

We are looking for a Quality Control Laboratory Technician who is able to work within our Test laboratory carrying out routine material testing in a busy manufacturing environment

#### **Main responsibilities:**

- o Performing product testing for Quality Control
- o Recording and communicating results
- o Following test methods
- o Adhering to Good Laboratory Practice
- o General Laboratory housekeeping and administrative duties

#### **The key skills:**

- o Able to focus on deadlines and objectives.
- o Work under own guidance and organise own work load with team priorities
- o Disciplined in following procedures and rules.
- o Methodical and accurate in record keeping and data analysis
- o Work constructively with different people at different levels and communicate effectively verbally or in writing
- o Self-starter, prepared to work to change and improve their own function
- o Develop own skills and knowledge

Educated to A level or equivalent in Science, Technology, Engineering or Maths subjects.

After a period of training will need to work Early and Late shifts

Further development through additional training is available.
